October 23, 2018 Meeting notes from IHLC Furniture Presentation

Presenting Marie Brown UF Planning Design and Construction

Wendy Simonson UF Planning Design and Construction

Hank Hollingsworth OEC Business Interiors, Inc

Introductions

Agenda - today we will review ideas (via slide show) of some layout options and proposed furniture items for your new space.

Basis of Design

1) Residential Aesthetic
2) Timeless look
3) Durability
4) Furniture as a compliment to the building design

Introduction of the floor plan overview of the 2 floors with furniture space plan in view.

Slides are shown illustrating furniture options for each space. Walked thru the plan area by area.

Comments:

It was discussed that the illustrations do not represent any color selections at this time, but students did indicate they did like some of the colors presented in the architects rendering.

In the Living room – please enlarge the seating change the sofa to a U shape. Add some additional chairs if possible. Maybe chairs on casters to move around easier.

Conf table – Students prefer the lower 29" high table, fixed style, not modular. Potrera style. Looked at Steelcase Qivi chairs as an option.

In the 2nd floor Event Space, add more Poly chairs for use when the movable wall is opened up. Added a larger Media Credenza to handle all of the AV and Computer storage.

In the Reflection room discussed Hosu seating, want to add personal table for laptop use or go to a lounge chair with arms and ottoman.

Outdoor space – want furniture to not be plastic. Use low tables and chairs not high tops. Product options to be researched.

Question to be researched – does the building include any display cases or wall units? If not, can we find spaces to add them.
